unpub.--unpublished

* -- Parts of fragments are indicated by asterisk (*) following number. The unit which became identified as a fragment in the final publication sometimes was composed of more than one fragment which were fitted together by the editors.

Preface

A. Purpose of this fascicle

Our goal is to produce a computerized database which will include information about photographs, documents and museum plates of the Dead Sea Scrolls. A computerized database will allow scholars to conduct different searches according to their particular research needs.

It is our intention to make the information in the lists available to scholars as quickly as possible. Since it will take some time before the computerized database will be complete, we have decided to compose preliminary lists about each of the particular collections (such as Cave 1, the Minor Caves and Murabbaat) and make these lists available to interested people in photocopy form. We wish to emphasize that these lists are still preliminary. The final database will include more information.

Much care has been taken to ensure that the information in these lists is accurate, but inevitably errors enter such a work. We would be appreciative if you would contact us about errors you find or additional information about the Minor Cave photographs at the Ancient Biblical Manuscript Center, Box 670, Claremont, CA 91711. (714) 621-6451. Fax number: 714-621-1481.

B. Assistance for Work

The production of these lists has involved the skills of many people. Over the years some preliminary and partial lists were produced by the original editors and by museum officials. The most comprehensive lists before I began my work were prepared by Elisha Qimron in 1981. Further updates were added in 1985 to these lists by Qimron and John Strugnell. All of these lists were made available to me by John Strugnell when I began updating the materials. I wish to acknowledge their contribution without which my work would have been far more difficult.

A Dorot Fellowship made it possible for me to spend a year in Jerusalem working on revising and updating these lists. The Ancient Biblical Manuscript Center has provided me funding for my work at the Center this year. From March to July 1989 and from August 1990 to the present I have been working with the photographs at the Ancient Biblical Manuscript Center and from August 1989 through July 1990 I worked with the fragments and photographs at the Rockefeller Museum.

The Israel Antiquities Authority staff at the Rockefeller Museum helped me find appropriate fragmentary and photographic materials at the museum. Joe Zias, curator, gave me access to the materials. Ruth Peled, Marcia Sharabani and Donald Ariel also provided assistance. Ayala Sussmann and later Ronny Reich allowed me access to

the photographs. Magen Broshi, curator of the Shrine of the Book, aided us in finding particular plates that had been moved to the Shrine of the Book for storage or conservation. The members of the Advisory Committee, composed of Amir Drori, Ayala Sussmann, Jonas Greenfield, Magen Broshi and Shemaryahu Talmon, have provided editorial assistance in the overall preparation of these lists.

The staff of the Ancient Biblical Manuscript Center helped me obtain access to the materials, provided administrative help, guidance and advice. James A. Sanders, president, has provided overall direction for the project. Former directors, Peter Pettit and Steve Delamarter, as well as the current acting director, Bruce Zuckerman, and Marilyn Lundberg, associate director, have provided much support.

Editors of the materials have provided a great deal of information. John Strugnell, international editor in chief while I was in Jerusalem, provided help in updating these lists and answering various questions that I had that arose while working on them.

Robert Hall spent many hours revising the lists of the Minor Cave photographs at the Manuscript Center. This often meant tracing the outlines of the fragments on tissue paper and identifying and tagging each fragment on a photograph. Eunice Banda, secretary at the ABMC, provided word processing assistance.

Every item of the lists here has been checked and verified by us at the Ancient Biblical Manuscript Center or in Jerusalem at the Rockefeller Museum.

C. How to acquire materials

For further information about photographic collections contact:

1. Photographic Services, Israel Antiquities Authority, P.O.B. 586, Jerusalem 91004, Israel. Telephone: (02) 292614; Fax No.: 292628

2. West Semitic Research Project, Bruce Zuckerman, 12 Empty Saddle Rd, Rolling Hills Estates 90274. (213) 541-4573

3. Ancient Biblical Manuscript Center, 1325 N. College Ave., P.O. Box 670, Claremont, CA 91711. (714) 621-6451

The Ancient Biblical Manuscript Center is an official depository of the Minor Cave photographs of the "PAM" collection. Scholars are welcome to come to the Center and view the published photographs held here. Photographs and rights of publication must be obtained from the holding museums.

I. Introduction

Information concerning the Minor Cave documents is arranged in three lists in this fascicle: documents, photographs and museum plates. In the document list the documents are listed sequentially according to their designated numbers in DJD 3. Included in this list are the

photographs which pertain to each document as well as the present location of the fragments. In the photograph list the photographs which pertain to Minor Cave documents are given according to the inventory numbers assigned in each photographic collection. The museum plate list includes a list of the museum plates which contain Minor Cave materials.

The document list is cross-referenced to the other two lists. It is expected that scholars would first refer to this list and then if they want further information about the photographs or museum plates they can refer to the other two lists. There is some duplication of information in the three lists but because there is often no one-to-one correspondence among documents, photographs and museum plates all three are necessary to provide all of the information that scholars may need in their research.

The Copper Scroll is presently in Amman, Jordan. The rest of the materials were at one time all in the Rockefeller Museum. Several museum plates (plates 62, 99, 100, 102, 104) are not presently at the Rockefeller but numbers and contents for these plates are found in older lists. Some of these plates are supposedly now at the Shrine of the Book, but this has not been confirmed.

Plates 99, 100, 102, 104 mentioned above as not presently at the Rockefeller contained 5Q materials. The 5Q fragments in general were not in good condition when they were found and it has often proven to be nearly impossible to identify particular fragments in the museum plates now. Many of them are quite illegible and crumbling.

There is some material, largely uninscribed tiny fragments, from the minor caves that was never published. The earlier system of labeling such items was to indicate the cave number followed by X and then a number (e.g. 3QX1). This system was not always consistently followed. Here I will follow that system when possible. For each cave in the document list these unpublished plates are listed after the published documents. Often I was not able to find a photograph which matched the fragments of these plates although some of these fragments had been photographed with other fragments.

Different editors of DJD 3 have used different means for numbering fragments. Neither M. Baillet nor J. T. Milik number each separate fragment. Fragment numbers are assigned to "reconstructed fragments" or even clusters of fragments. This makes it more difficult to inventory material accurately. This is why sometimes an asterisk (*) is used to designate part of a "fragment". Milik also uses another designation of Roman numerals for column numbers. Columns I-VI of 5Q6 are considered to be part of fragment 1. When there is only one reconstructed fragment for a document Milik numbers this as fragment 1 for the 5Q materials. For caves 2-3, 6, 9, 10 when there is only one reconstructed fragment for a document Baillet does not number this fragment. On pl. XXIII in DJD 3, fragments 6 and 7 are not

numbered on the page, but one can tell what fragments should be numbered 6 and 7 by comparing the transcriptions.

The photographs in the "PAM" series do not have dates but since they were assigned inventory numbers soon after they were photographed one can at least differentiate earlier from later photographs by the inventory number. Generally the latest photographs in the PAM series are better organized and closer to the published format in the DJD series than the earliest photographs. For caves 2-3, 6-10 photographs were taken of the plates close to when DJD 3 was ready to be published. Similar photographs for Cave 5 do not exist.

Earlier photographs contain a more mixed grouping of fragments. Often fragments have not yet been "reconstructed" and fitted together on these early photographs. Sometimes it is possible to see joins where fragments were fitted together on later photographs. The earlier photographs can help one see which fragments have been reconstructed.

Most of the photographs of the minor cave documents are in the "PAM" photographs taken before 1967. The West Semitic Research Project possesses photographs of the Copper Scroll and the Dead Sea Scrolls currently in Amman.

To understand the nature of the photographs of the Copper scroll one must understand the process of how the Copper Scroll was unrolled and photographed. (See "Introduction" by R. de Vaux, pp. 201-202, "Notes on the Opening of the Copper Scroll from Qumran," by H. Wright Baker, pp. 203-210, and "Note Liminaire," by J. T. Milik, pp. 211-212 in DJD 3 and look at pls. XLIII-LXXI).

Three pieces of "copper-base metal" were riveted together to make one copper scroll. When the scroll was rolled up one of the seams came apart. The two pieces were then separately rolled so that two scrolls were found by scholars (Baker p. 203).

Because the two scrolls were so fragile and could not be unrolled it was determined that the best way to study the "scrolls" was to cut the scrolls into longitudinal strips. 23 such strips were cut. These strips were not flat but were shaped like half-cylinders. Mr. Ashton prepared "nearly 300 photographs" during the entire process of opening the scrolls (Baker, p. 210).

H. Baker indicates that white paint was used on the back side of each strip to indicate angular positions, along with a letter corresponding to the convolution (Baker, p. 207). These marks can be seen on the photographs of the back side made by the Zuckermans. Each of the half-cylinders is marked by a number from 1-23. The arrangement of the photographs in Milik's presentation corresponds to this order. It is difficult to tell, however, in DJD where one section begins and one ends.

J. Starcky later made several photographs of the strips (Milik, p. 211). Because the strips were so curved it proved to be impossible to make a composite picture of all

of the strips laid next to one another that was very legible. Pls. XLVI to XLVII represent an attempt made at Manchester to do this of columns IX through XII (Milik, p. 211). The photographs which follow in DJD pls. XLIX and following pages do not correspond closely with the twenty three sections. First of all, the photographs were cut horizontally. Secondly, several shots of one section which are frequently focused on the right side, center and left side of a section are given side by side. This often leads to duplication of letters on the various photographs of each section. The following chart helps one to correlate which sections are on which plate.

pl. XLIX	cuts 1-4	col. I
pl. LI	cuts 5-6	col. II
pl. LIII	cuts 7-8	col. III
pl. LV	cuts 9-10*	col. IV
pl. LVII	cuts 10*-11	col. V
pl. LIX	cut 12	col. VI
pl. LXI	cuts 13-14	col. VII
pl. LXIII	cut 15	col. VIII
pl. LXV	cuts 16-17*	col. IX
pl. LXVII	cuts 17*-18	col. X
pl. LXIX	cuts 19-20	col. XI
pl. LXXI	cuts 21-23	col. XII

The photographs in the PAM collection are largely either of the unrolled "scrolls" or of the final plates found in DJD. This collection does not contain either the photographs made by Mr. Ashton at Manchester or the earlier photographs made by Starcky which were used for these final photographic plates in DJD. The whereabouts of these last two collections are unknown.

A new edition of the Copper Scroll is being prepared under the joint sponsorship of the Department of Antiquities of Jordan (Fawzi Zayadine), the West Semitic Research Project (Bruce Zuckerman), Princeton Theological Seminary (James Charlesworth) and Johns Hopkins University (P. K. McCarter). On behalf of the above consortium, in 1988 Bruce and Kenneth Zuckerman took new photographs of the sections of the Copper Scroll in Amman, Jordan. They made a complete set of black and white and color photographs of both the front and back of each strip. Furthermore, generally six shots were made for the inscribed side of each strip. The strips were rotated so that shots could be taken of the right side, center and left side. Separate shots were made with light from the top and light from the bottom. In a few cases where feasible side lighting was also used.

II. Documents

The document list is largely based on the numbering of documents found in DJD 3. For bibliographic information on the Minor Cave documents see Joseph A. Fitzmyer, The Dead

Sea Scrolls: Major Publications and Tools for Study,
 Scholars Press, 1990; F. Garcia Martinez, "Lista de MSS
 procedentes de Qumran," Henoch 11, 1989, pp. 149-232. For
 general information see Stephen A. Reed, "Survey of the Dead
 Sea Scrolls Fragments and Photographs at the Rockefeller,"
BA 54 (March 1991) 44-51.

2. West Semitic Research Project Collection of Amman
Photographs of the Copper Scroll.

This collection of photographs includes color and black and white of both sides of each cut. Separate shots were taken of the right side, center, and left side when necessary. Separate shots were also taken with light from the top and light from the bottom. AWS 1-11 were of 1Q photographs shot in Amman.

IV. Museum Plates at Rockefeller

A. List of plates of each cave

2Q plates: 62, 643-645, 739-742, 749

3Q plates: 648, 743-748, 1009

5Q plates: 50, 97-104

6Q plates: 29, 646, 649, 737-738, 784-787, 892-895

7Q plates: 789, 789A

8Q plates: 56-58, 788, 914-917

9Q plate: 917 (part)

10Q plate: 918

B. List of contents of plates in order:

29. 6QX3 6Q18 unpub frg
50. 5QX1 Blanks leather pieces, mostly very fragmentary
56. 8QX1 Reinforcing tabs, see photo in DJD 6 pl. V a
57. 8QX2 thongs, reinforcing tabs and a triangular tab DJD 6, pl. V d
58. 8QX3 thongs (loosely within glass plates) DJD 6 pl. V b
62. 2Q16 Missing at Rockefeller possibly at Shrine of Book
97. 5Q1 pl. XXXVI col. I, most of II frg 1*, and other tiny frgs, crumbling
98. 5Q2 pl. XXXVI most of frg c but quite decomposed
5Q5 pl. XXXVII part of frg 1, most of frg 2 part of II, crumbling, bad shape
99. 5Q3 Missing at Rockefeller possibly at Shrine of Book
100. 5Q4-5Q8 Missing at Rockefeller possibly at Shrine of Book
101. 5Q11 pl. XXXVIII frg 1
5Q22 pl. XLII
5Q14 pl. XL frg 1
5Q16 pl. XLI frgs 2,3*,5
+ frgs (based on photo--frgs are small, crumbling, and illegible, difficult to tell what is on them)
102. 5Q18-5Q22 Missing at Rockefeller possibly at Shrine of Book .
103. 5Q15 pl. XL most pieces are here; pl. XLI some pieces are here
104. 5Q5 Missing at Rockefeller possibly at Shrine of Book
