following number. The unit which became identified as a
fragment in the final publication sometimes was composed of
more than one fragment which were fitted together by the
editors.

Preface

A. Purpose of this fascicle

Our goal is to produce a computerized database which will include information about photographs, documents and museum plates of the Dead Sea Scrolls. A computerized database will allow scholars to conduct different searches according to their particular research needs.

It is our intention to make the information in the lists available to scholars as quickly as possible. Since it will take some time before the computerized database will be complete, we have decided to compose preliminary lists about each of the particular collections (such as Cave 1, the Minor Caves and Murabba'at) and make these lists available to interested people in photocopy form. We wish to emphasize that these lists are still preliminary. The final database will include more information.

Much care has been taken to ensure that the information in these lists is accurate, but inevitably errors easily enter such a work. We would be appreciative if you would contact us with errors you find or additional information about the Murabba'at photographs at the Ancient Biblical Manuscript Center, Box 670, Claremont, CA 91711. (714) 621-6451. Fax number: 714-621-1481.

B. Assistance for Work

The production of these lists has involved the skills of many people. Over the years some preliminary and partial lists were produced by the original editors and by museum officials. The most comprehensive lists before I began my work were prepared by Elisha Qimron in 1981. Further updates were added in 1985 to these lists by Qimron and John Strugnell. All of these lists were made available to me by John Strugnell when I began updating the materials. I wish to acknowledge their contribution without which my work would have been far more difficult.

A Dorot Fellowship made it possible for me to spend a year in Jerusalem working on revising and updating these lists. The Ancient Biblical Manuscript Center has provided me funding for my work at the Center this year. From March to July 1989 and from August 1990 to the present I have been working with the photographs at the Ancient Biblical Manuscript Center and from August 1989 through July 1990 I worked with the fragments and photographs at the Rockefeller Museum.

The Israel Antiquities Authority staff at the Rockefeller Museum helped me find appropriate fragmentary and photographic materials at the museum. Joe Zias, Curator, gave me access to the materials. Ruth Peled, Marcia Sharabani and Donald Ariel also provided assistance. Ayala Sussmann and Ronny Reich allowed me access to the

photographs. Magen Broshi, Curator of the Shrine of the Book, aided us in finding particular plates that had been moved to the Shrine of the Book for storage or conservation. The members of the Advisory Committee, composed of Amir Drori, Ayala Sussmann, Jonas Greenfield, Magen Broshi and Shemaryahu Talmon, have provided editorial assistance in the overall preparation of these lists.

The staff of the Ancient Biblical Manuscript Center helped me obtain access to the materials, provided administrative help, guidance and advice. James A. Sanders has provided overall direction for the project. Former directors, Peter Pettit and Steve Delamarter, as well as the current acting director, Bruce Zuckerman, and Marilyn Lundberg, Associate Director, have provided much support.

Editors of the materials have provided a great deal of information. John Strugnell, international editor in chief while I was in Jerusalem, provided help in updating these lists and answering various questions that I had that arose while working on them.

Robert Hall spent many hours revising the lists of the Murabba'at photographs at the Manuscript Center. This often meant tracing the outlines of the fragments on tissue paper and identifying and tagging each fragment on a photograph. Eunice Banda and Stan Faryna provided word processing assistance.

Every item of the lists here has been checked and verified by us at the Ancient Biblical Manuscript Center or in Jerusalem at the Rockefeller Museum.

C. How to acquire materials

For further information about photographic collections contact:

1. Photographic Services, Israel Antiquities Authority, P.O.B. 586, Jerusalem 91004, Israel. Telephone: (02) 292614; Fax No. 292628
2. Ancient Biblical Manuscript Center, 1325 N. College Ave., P.O. Box 670, Claremont, CA 91711. (714) 621-6451

The Ancient Biblical Manuscript Center is a depository of the Murabba'at photographs of the "PAM" collection. Scholars are welcome to come to the Center and view the photographs held here. Photographs and rights of publication must be obtained from the holding museums

I. Introduction

Information concerning the Murabba'at documents is arranged in three lists in this fascicle: documents, photographs and museum plates. In the document list the documents are listed sequentially according to their designated numbers in DJD 2. Included in this list are the photographs which pertain to each document as well as the

present location of the fragments. In the photograph list the photographs which pertain to Murabba'at documents are given according to the inventory numbers assigned in the PAM photographic collection. The museum plate list includes a list of the museum plates which contain Murabba'at materials.

The document list is cross-referenced to the other two lists. It is expected that scholars would first refer to this list and then if they want further information about the photographs or museum plates they can refer to the other two lists. There is some duplication of information in the three lists but because there is often no one-to-one correspondence among documents, photographs and museum plates all three are necessary to provide all of the information that scholars may need in their research.

Different editors of DJD 2 have used different means for numbering fragments. J. T. Milik edited Mur 1-88, P. Benoit edited Mur 89-168 and Ad. Grohman edited Mur 169-173. None of the editors numbered each separate fragment which was found. Fragment numbers are assigned to "reconstructed fragments" or even clusters of fragments. This makes it difficult to inventory material accurately. This is why an asterisk (*) is used to designate part of a "fragment", since on earlier photographs often individual fragments have not yet been fitted together.

For Milik, when there are separate fragments of a document these are designated by Arabic numbers such as for Mur 25 or Mur 26. In Mur 88 Roman numerals designate columns while Arabic numerals designate isolated fragments which cannot be associated with columns. For Mur 24 capital letters are used to designate columns. For Palimpsest Mur 17 "A" refers to a letter, "B" refers to a list of people. Both "documents" are written on the recto side of the palimpsest. Designations of recto and verso indicate which side of a document is being discussed.

For Benoit documents with more than one fragment have separate fragments designated by small letters. Recto and Verso of the same document are so designated. In one case two different documents are found on the Recto and Verso sides. Thus Mur 112 is the recto side of Mur 113 which is the verso side.

Since one document has both Greek and Arabic on it, it has been assigned two different numbers. Thus Mur 157 is also designated as Mur 171 Verso.

The photographs in the "PAM" series do not have dates but since they were assigned inventory numbers soon after they were photographed one can generally differentiate earlier from later photographs by the inventory number. Generally the latest photographs in the PAM series are better organized and closer to the published format in the DJD series than the earliest photographs.

Earlier photographs contain a more mixed grouping of fragments. Often fragments have not yet been "reconstructed" and fitted together on these early

photographs. Sometimes it is possible to see joins where fragments were fitted together on later photographs. Sometimes it is not. The earlier photographs can help one see which fragments have been reconstructed.

There are two photographs in the ABMC collection which contain Mur 43 but do not have PAM numbers associated with them. By the positioning of the ruler beside the fragment it appears that they are enlargements of this document related to photo 40.379. I have labeled these two photographs 40.379A and 40.379B.

Photographs for Ostraca Mur 82-84 do not appear in DJD although brief descriptions are given. The precise photographs from the PAM system and the museum plates for these ostraca have not been identified.

43.870 is marked with Mur 24 but it does not correspond with what has been published. 43.873 and 43.873A contain the recto and verso sides of a museum plate with papyrus fragments. It is not clear if this plate was from Murabba'at or not.

There are at least eleven museum plates of unpublished Murabba'at materials. Following earlier numbering designations, these are labeled MurX1 through Mur X11. Museum plate 993 consists of three boxes of cloth and leather fragments with little writing, presumably a rat's nest, which seem to correspond with PAM photograph 40.170 which is published in DJD pl. II. There are also miscellaneous fragments found on other museum plates and photographs which are not published.

II. Documents

The document list is largely based on the numbering of documents found in DJD 2. For bibliographic information on the Murabba'at documents see Joseph A. Fitzmyer, The Dead Sea Scrolls: Major Publications and Tools for Study, Scholars Press, 1990. For general information see Stephen A. Reed, "Survey of the Dead Sea Scrolls Fragments and Photographs at the Rockefeller," BA 54 (March 1991) 44-51.
