ABMC--Ancient Biblical Manuscript Center

col(s).--column(s)

DJD--Discoveries in the Judaean Desert

frg(s)--fragment(s)

"PAM"--Palestine Archaeological Museum (original designation  
of accession numbers used in Rockefeller Museum for set  
of photographs largely taken before 1967)

pl(s)--plate, plates (can be used for published photographic  
plates or for the museum plates which hold the  
fragments)

pub.--published

ROC--Rockefeller Museum in Jerusalem

unpub.--unpublished

\* -- Parts of fragments are indicated by asterisk (\*)  
following number. The unit which became identified as a  
fragment in the final publication sometimes was composed of  
more than one fragment which were fitted together by the  
editors.

### Preface

#### A. Acknowledgements for Financial Support

From March to July 1989 and from August 1990 to the present I have been working with the photographs at the Ancient Biblical Manuscript Center and from August 1989 through July 1990 I worked with the fragments and photographs at the Rockefeller Museum. A Dorot Fellowship made it possible for me to work on the project from March to July 1989 at the ABMC and spend a year in Jerusalem working on revising and updating these lists. The Ancient Biblical Manuscript Center has provided me funding for my work at the Center from August through June of 1991. Additional funding was made available July 1991 through the Dorot Foundation and a grant from the National Endowment for the Humanities.

#### B. Purpose of this fascicle

Our goal is to produce a computerized database which will include information about photographs, documents and museum plates of the Dead Sea Scrolls. A computerized database will allow scholars to conduct different searches according to their particular research needs.

It is our intention to make the information in the lists available to scholars as quickly as possible. Since it will take some time before the computerized database will be complete, we have decided to compose preliminary lists about each of the particular collections (so far Cave 1, the Minor Caves, Murabba'at and 4Q128-4Q186) and make these lists available to interested people in photocopy form. We wish to emphasize that these lists are still preliminary. The final database will include more information.

Much care has been taken to ensure that the information in these lists is accurate, but inevitably errors enter such a work. We would be appreciative if you would contact us about errors you find or additional information about the photographs of 4Q482-4Q520 at the Ancient Biblical Manuscript Center, Box 670, Claremont, CA 91711. (714) 621-6451. Fax number: 714-621-1481.

#### C. Assistance for Work

The production of these lists has involved the skills of many people. Over the years some preliminary and partial lists were produced by the original editors and by museum officials. The most comprehensive lists before I began my work were prepared by Elisha Qimron in 1981. Further updates were added in 1985 to these lists by Qimron and John Strugnell. All of these lists were made available to me by John Strugnell when I began updating the materials. I wish to acknowledge their contribution without which my work would have been far more difficult.

The Israel Antiquities Authority staff at the Rockefeller Museum helped me find appropriate fragmentary and photographic materials at the museum. Joe Zias, curator, gave me access to the materials. Ruth Peled, Marcia Sharabani and Donald Ariel also provided assistance. Ayala Sussmann and Ronny Reich allowed me access to the photographs. Magen Broshi aided us in finding particular plates that had been moved to the Shrine of the Book for storage or conservation. The members of the Advisory Committee, composed of Amir Drori, Ayala Sussmann, Jonas Greenfield, Magen Broshi and Shemaryahu Talmon, have provided editorial assistance in the overall preparation of these lists.

The staff of the Ancient Biblical Manuscript Center helped me obtain access to the materials, provided administrative help, guidance and advice. James A. Sanders, president, has provided overall direction for the project. Former directors, Peter Pettit and Steve Delamarter, as well as the current acting director, Bruce Zuckerman, and Marilyn Lundberg, Associate Director, have provided much support.

Editors of the materials have provided a great deal of information. John Strugnell, international editor in chief while I was in Jerusalem, provided help in updating these lists and answering various questions that arose while working on them.

Marilyn Lundberg and Robert Hall assisted in revising the lists of the 4Q482-4Q520 photographs at the Manuscript Center. This often meant tracing the outlines of the fragments on tissue paper and identifying and tagging each fragment on a photograph. Eunice Banda, secretary at the ABMC, and Stan Faryna, student at U.S.C., both provided word processing assistance.

Marilyn Lundberg compiled the list of the card concordance sigla and their present day equivalents. Randall Reed compiled the bibliographic data and provided word processing assistance.

Every item of the lists here has been checked and verified by us at the Ancient Biblical Manuscript Center or in Jerusalem at the Rockefeller Museum.

#### D. How to acquire materials

For further information about photographic collections contact:

1. Photographic Services, Israel Antiquities Authority, P.O.B. 586, Jerusalem 91004, Israel. Telephone: (02)292614; Fax number: 292628.

2. Ancient Biblical Manuscript Center, 1325 N. College Ave., P.O. Box 670, Claremont, CA 91711. (714) 621-6451 Fax number: 714-621-1481

The Ancient Biblical Manuscript Center is an official depository of the 4Q482-4Q520 photographs of the "PAM" collection. Scholars are welcome to come to the Center and view photographs of these documents here. Photographs and

rights of publication must be obtained from the holding museums.

### I. Introduction

This fascicle contains information about one collection of the Cave 4 documents published in the DJD series volume 7: 4Q482-4Q520.

Information concerning the 4Q482-4Q520 documents is arranged in three lists: documents, photographs and museum plates. In the document list the documents are listed sequentially according to their designated numbers in DJD 7. Included in this list are the photographs which pertain to each document as well as the present location of the fragments. In the photograph list the photographs which pertain to these documents are given according to the inventory numbers assigned in the PAM photographic collection. The museum plate list includes a list of the museum plates which contain these materials.

The document list is cross-referenced to the other two lists. It is expected that scholars would first refer to this list and then if they want further information about the photographs or museum plates they can refer to the other two lists. There is some duplication of information in the three lists but there is often no one-to-one correspondence among documents, photographs and museum plates. All three are necessary to provide all of the information that scholars may need in their research.

The photographs in the "PAM" series do not have dates but since they were assigned inventory numbers soon after they were photographed one can generally differentiate earlier from later photographs by the inventory number. Generally the latest photographs in the PAM series (43.000 and 44.000 series) are better organized and closer to the published format in the DJD series than the earlier photographs (42.000, 41.000, 40.000 series). Two early series are particularly marked. A set of photographs of materials bought by the government are marked with a G (G1-G66 for 40.575-40.637, 40.986-40.990). A second set of excavation photographs for fragments found during excavation of Cave 4 are marked with an E (E1-E22 for 40.962-40.985).

Earlier photographs contain a more mixed grouping of fragments. Often fragments have not yet been "reconstructed", i.e. fitted together, on these early photographs. Sometimes it is possible to see joins where fragments were fitted together on later photographs. The earlier photographs can help one see which fragments have been reconstructed.

The early 4Q photographs have miscellaneous fragments from the whole 4Q collection. These photographs have not yet been completely inventoried. Identification of 4Q documents outside of 4Q482-4Q520 have also not been consistently designated on these earlier photographs. As work progresses on other 4Q collections, the contents of

these earlier photographs will need to be updated. More photographs of some of the fragments from 4Q482-4Q520 may also be identified.

In the following lists plate numbers before fragment numbers indicate the published photographs in the DJD volumes. The focus of attention in this fascicle is on DJD 7 which includes documents 4Q482-4Q520. On some photographs, of course, documents from other collections are found. Full bibliographies of these documents are not given. Briefly, however, the following list may be helpful:

4Q1-127 contain Biblical texts formerly assigned to Patrick Skehan and Frank M. Cross.

4Q128-157 contain Tefillin, Mezuzot and Targums which were published by J.T. Milik in DJD 6 (1977).

4Q158-186 contain paraphrases and commentaries on Biblical books and were published by John M. Allegro in DJD 5 (1968).

4Q187-4Q195 (Currently no documents here)

4Q196-363 contain texts assigned to J. T. Milik. These include apocryphal books, pseudepigraphic works, commentaries, rules and regulations, sapiential texts, calendaric texts, and some non-literary texts.

4Q364-481 contain various writings assigned to John Strugnell which are related to Pentateuchal, prophetic, hymnic, liturgical, legal and sapiential Biblical texts.

4Q482-520 contain apocryphal works, copies of the War Scroll, liturgical and legal texts as well as papyrus fragments. These were published by Maurice Baillet in DJD 7 (1982).

4Q521-575 contain some Hebrew but mostly Aramaic documents formerly assigned to Jean Starcky and to be edited by Émile Puech.

For bibliographic information on 4Q482-4Q520 documents see Joseph A. Fitzmyer, The Dead Sea Scrolls: Major Publications and Tools for Study, Scholars Press, 1990; F. Garcia Martinez, "Lista de MSS procedentes de Qumran," Henoch 11, 1982, pp. 149-232. The sigla suggested for the documents 4Q482-4Q520 by Fitzmyer are used in this fascicle. For general information see Stephen A. Reed, "Survey of the Dead Sea Scrolls Fragments and Photographs at the Rockefeller," BA 54 (March 1991) 44-51.

Maurice Baillet had new photographs taken for DJD 7. An outside photographer, David Harris, was called upon to do the work. These were taken from February 14 through March 10, 1972 according to Baillet. These photographs were numbered 1-8 and 10-73. Presently neither Maurice Baillet, David Harris or museum officials know the location of this set of negatives.

This means that generally the latest photographs in the PAM series do not correspond precisely with the published photographs in DJD 7. Photographs of a considerable number of the published fragments have not yet been found and these are noted as "unlocated."

It often was next to impossible, particularly with the museum plates full of very small fragments, to identify

completely all of the contents of these plates. Some fragments were not found in the plates and these are noted in the list of museum plates. M. Baillet notes that the large pieces of 4Q504 could not be found when he did his work.

Baillet sent me an earlier list of photographs given by him to Magen Broshi of documents that would appear in DJD 7. Unfortunately this list was keyed to a different numbering system for the documents. In some instances, however, it was useful.

Fragments are not always arranged consecutively on a particular page. In a few instances particular numbers for fragments could not be found either in the photographs or in the discussion of the fragments: 4Q496 frgs 14,75; 4Q502 frgs 17,134,186; 4Q503 frgs 12,59,63,97,130,220; 4Q506 frg 165; 4Q509 frgs 14,75,120-130,149,165; 4Q512 frgs 12,59,63,97,130,220.

In DJD 7 Baillet sometimes mentioned particular photographs from the PAM series when older photographs preserved better information. Information from these notes has been checked and integrated into the following lists. There are a few problems with these numbers. The reference to fragment 63 of 4Q511 on 42.087 (p. 247) cannot be right since this photograph has Arabic fragments on it. The reference to fragment 2 of 4Q511 on 43.624 (p. 222) should probably be 43.623 which does have that fragment. The reference to fragment 71 of 4Q503 on 42.483 (p. 126) should probably be 42.482 which does have that fragment. I cannot locate fragment 296 of 4Q509 on 42.067 (p. 215), or fragment 10 of 4Q511 on 41.591 (p. 199), or fragment 23 of 4Q502 on 41.989 (p. 88).

Baillet gives an index of some of the earlier sigla used for his documents on p. 313 in DJD 7. This can be consulted for earlier references to these documents. Here a list of the sigla used for these documents in the card concordance will be given. Many of these documents also had earlier sigla assigned to them by other scholars.

Card Con. No.	Pub. 4Q No.	Earlier Starcky No.
Bt 1	4Q513	Sy 32
Bt 2	4Q514	Sy 2
Bt 3	4Q504	Sy 33-34
Bt 4	4Q511	Sy 41-47
Bt 5	4Q510	
Bt 6	4Q508	Sy 35
Bt 7	4Q507	
Bt 8	4Q501	

Another numbering system is sometimes used on the museum plates themselves and not for the documents. One can see this in part in the numbers 4QBt 65 though 4QBt 68 for the five plates of unpublished papyrus fragments. It does not seem to be helpful to reconstruct this system except for these five plates.
