Preface

A. Acknowledgements for Financial Support

From March to July 1989 and from August 1990 to the present Dr. Reed has been working with the photographs at the Ancient Biblical Manuscript Center and from August 1989 through July 1990 Dr. Reed worked with the fragments and photographs at the Rockefeller Museum. A Dorot Fellowship made it possible for Dr. Reed to work on the project from March to July 1989 at the ABMC and spend a year in Jerusalem working on revising and updating these lists. The Ancient Biblical Manuscript Center has provided funding for work at the Center from August 1990 through June of 1991. Additional funding has been made available since July 1991 by grants from the Dorot Foundation, the Annenberg Institute and the National Endowment for the Humanities.

B. Purpose of this fascicle

Our goal is to produce a computerized database which will include information about photographs, documents and museum plates of the Dead Sea Scrolls. A computerized database will allow scholars to conduct different searches according to their particular research needs.

It is our intention to make the information in the lists available to scholars as quickly as possible. Since it will be some time before the computerized database is complete, we have decided to compose preliminary lists of each of the particular collections (such as Cave 1, the Minor Caves, Murabba'at and 4Q128-4Q186) and make these lists available to interested people in photocopy form. We wish to emphasize that these lists are still preliminary. The final database will include more and updated information.

Much care has been taken to ensure that the information in these lists is accurate, but inevitably errors enter such a work. We would appreciate receiving corrections or further information concerning the photographs of 4Q364-4Q481 at the Ancient Biblical Manuscript Center, P.O. Box 670, Claremont, CA 91711. Phone (714) 621-6451. Fax number: (714) 621-1481.

C. Assistance for Work

The production of these lists has involved the skills of many people. Over the years some preliminary and partial lists were produced by the original editors and by museum officials. The most comprehensive lists before I began my work were prepared by Elisha Qimron in 1981. Further updates were added in 1985 to these lists by Qimron and John Strugnell. All of these lists were made available to me by John Strugnell when I began updating the materials. I wish to acknowledge their contribution without which my work would have been far more difficult.

The Israel Antiquities Authority staff at the Rockefeller Museum helped me find appropriate fragmentary and photographic materials at the museum. Joe Zias, curator, gave me access to the materials. Ruth Peled, Marcia Sharabani and Donald Ariel

also provided assistance. Ayala Sussmann and Ronny Reich allowed me access to the photographs. Magen Broshi aided us in finding particular plates that had been moved to the Shrine of the Book for storage or conservation. The members of the Advisory Committee, composed of Amir Drori, Ayala Sussmann, Jonas Greenfield, Magen Broshi and Shemaryahu Talmon, have provided editorial assistance in the overall preparation of these lists.

The staff of the Ancient Biblical Manuscript Center helped me obtain access to the materials, and provided administrative help, guidance and advice. James A. Sanders, president, has provided overall direction for the project. Former directors, Peter Pettit and Steve Delamarter, as well as the current acting director, Bruce Zuckerman, and Marilyn Lundberg, Associate Director, have provided much support.

Editors of the materials have provided a great deal of information. John Strugnell, international editor-in-chief while I was in Jerusalem, provided help in updating these lists and answering various questions that arose while working on them. Current editors, Emanuel Tov, Eugene Ulrich, and Emile Puech have also provided assistance. Stephan Pfann has provided editorial assistance and has provided new information for this fascicle.

Marilyn Lundberg compiled the list of the card concordance sigla and their present day equivalents. Randall Reed compiled the bibliographic data and provided word processing assistance.

Every item of the lists here has been checked and verified by us at the Ancient Biblical Manuscript Center or in Jerusalem at the Rockefeller Museum.

The Ancient Biblical Manuscript Center is an official depository of the Starcky Photographs of the "PAM" collection. Scholars are welcome to come to the Center and view photographs of these documents. A number of the PAM photographs inventoried in this fascicle can be found in A Facsimile Edition of the Dead Sea Scrolls: Prepared with an Introduction and Index by Robert H. Eisenman and James M. Robinson (Washington, D.C.: Biblical Archaeology Society, 1991). A microfilm prepared by Robert Schlosser of the Huntington Library is available which includes the complete PAM collection as well as photographs from other collections.

I. Introduction

Emile Puech has been very helpful in providing me information concerning the Starcky materials which he is editing. Puech supplied me with older lists of this material compiled by Jean Starcky.

Information concerning the Starcky documents is arranged in three lists in this fascicle: documents, photographs and museum plates. There are three lists of Starcky documents. The first is arranged according to the sigla used in the card concordance for these documents. The second is arranged according to the older sigla of Starcky numbers. The third is arranged according to the designated numbers given to the Starcky material to be included in 4Q521-4Q575. Included in the third list are the photographs which pertain to each document, the present location of the fragments in museum plates, the publication status of each document, and a quantitative indication of the extent of each document supplied to me by Emile Puech. In the photograph list the photographs which pertain to Starcky documents are given according to the assigned inventory numbers. The museum plate list includes a list of the museum plates which contain Starcky materials.

Since published photographs are called "plates", it can be confusing to refer to the fragments placed between plates of glass in the museum as "plates." Editor Emanuel Tov prefers that the term "inventory number" be used for what is here called "museum plate."

The document list is cross-referenced to the other two lists. It is expected that scholars would first refer to this list and then if they want further information about the photographs or museum plates they can refer to the other two lists. There is some duplication of information in the three lists but because there is often no one-to-one correspondence among documents, photographs and museum plates all three are necessary to provide all of the information that scholars may need in their research.

Most of the museum plates that contain Starcky materials are housed currently at the Rockefeller Museum. I have been unable to locate the plate which contains 4Q537 Visions of Amram^C. Plate 158 which according to the older lists contained Sy 18 Aramaic fragment O is missing from the Rockefeller. This document was probably 4Q551 DanSuz.(?) I have not been able to locate the Testuz fragment which is a part of 4Q537.

The photographs in the "PAM" series do not have dates but since they were assigned inventory numbers soon after they were photographed one can at least differentiate earlier from later photographs by the inventory number. The latest set of photographs which Starcky had made is found in 43.564-43.607, 43.610 and contains a complete set of the Starcky material. These photographs correspond quite closely to the arrangement of the fragments in the museum plates. Earlier photographs contain a more mixed grouping of fragments. These photographs are listed under the category "misc." Often fragments have not yet been "reconstructed" and fitted together on these early photographs. Sometimes it is possible to see

joins where fragments were fitted together on later photographs. The earlier photographs can help one see which fragments have been reconstructed.

For bibliographic information on published Starcky documents see Joseph A. Fitzmyer, The Dead Sea Scrolls: Major Publications and Tools for Study, (Scholars Press, 1990); F. García Martínez, "Lista de MSS procedentes de Qumran," Henoch 11 (1989), 149-232. For general information see Stephen A. Reed, "Survey of the Dead Sea Scrolls Fragments and Photographs at the Rockefeller," BA 54 (March 1991) 44-51.

Changes in titles may well take place as further work of editing continues. Changes in the order of the documents may also be made. Users should remember that this fascicle is preliminary and that changes will no doubt need to be made for some time in these lists.
